It is hereby confirmed that the CO₂-footprint of the Printy and Professional stamps of Trodat GmbH listed here was calculated according to the "Cradle to Gate" approach. This includes emissions from raw material extraction, local production and all transport to the Trodat GmbH warehouse.

Trodat GmbH follows the holistic approach of ClimatePartner – avoid before reduce before compensate CO₂ – by minimizing the CO₂-footprints of the listed products before compensating the unavoidable CO₂-emissions through recognized carbon offset projects certified according to international standards. This investment ensures the labelling of climate-neutral Trodat Printy and Trodat Professional stamps.

viene utilizzata una grande percentuale di plastica riciclata, tenendo conto degli esigenti standard di qualità Trodat, riducendo così in modo significativo l'impronta di CO₂. Dal 2012 lavoriamo a progetti per ridurre costantemente l'impronta di carbonio dei nostri prodotti, oltre a numerose misure di protezione ambientale.

Oltre ai nostri sforzi per raggiungere gli Obiettivi di Sviluppo Sostenibile (SDG) delle Nazioni Unite, stiamo combattendo il cambiamento climatico globale con i nostri progetti di protezione del clima Gold Standard VER. Questi progetti di protezione del clima sono controllati e certificati annualmente da TÜV Austria, un'azienda leader nella verifica ambientale.
