

## Secure Pro USB 3.0 Drive

USB devices have evolved into useful storage media. But with these advantages comes a danger - just one lost or stolen USB drive could prove disastrous, leaving private notes or financial data exposed. The EU General Data Protection Regulation (GDPR) imposes strict penalties on organisations that do not protect the personal data of individuals or other organisations which they hold.

The Verbatim Store 'n' Go Secure Pro USB drive encrypts data stored on the drive and secures it with a password. This minimises risk by ensuring that data cannot be accessed if the drive is lost or stolen.

- **Mandatory 100% drive encryption**
- **GDPR & FIPS 140-2 Compliant**
- **Military Grade hardware-based 256-bit AES encryption**
- **Preloaded with an intuitive auto run security application for password protection**
- **Password hashing algorithm**
- **Hack resistant password entry - erases data after 10 failed entry attempts**
- **Strict authorisation policy & password rules**
- **No admin rights required on host PC**
